PROFILE

Seeking a challenging role in a dynamic organization like yours, where I can apply my skills, knowledge, and creativity while growing alongside the company's progress.

PROJECTS

AGRI-AID

Developed a full-stack web application that provides farmers with real-time crop recommendations using soil data. Built the backend with Flask and integrated a machine learning model to predict optimal crops based on input data.

TravelVerse

Created a website that provides personalized travel recommendations and itineraries using Flask, JavaScript, and HTML/CSS.

Portfolio Website

Designed and developed a portfolio website using Flask to showcase personal projects and achievements. Deployed on Render and continuously updated with new projects.
